Prof. Joshua Lederberg
Department of Genetics
Stanford University Medical Center
Palo Alto, California

Dear Joshua:

I have to be in Portland April 26th for a N.I.H. field visit to a field-ion-microscope. I thought I would come down to Stanford that evening and spend Saturday and Sunday the 27th and 28th looking into the housing situation. If Edna Friedman has turned up anything new for the summer I would appreciate it if she let me know so that I can write to the owner and arrange for a visit at that time.

I will give you a ring at the Lab and hope to see you and Le~~W~~inthal for an hour or two if you are in.

Yours

John R. Platt
